Five-step assembly

Portable solutions for inaccessibility toilets and showers

For many handicapped people, it is especially the simple and most personal things that become the most complicated ones and those that create physical and emotional distress.

Yes, the ability to use the toilet in every place, at any time and without limitations, is not yet to be taken for granted. It is precisely from this view, that Seatarra is launching the Wheelable, a unique commode and shower chair which will enable any handicapped person to use a regular toilet stall.

Assembly in few seconds while sitting in the chair.

Easy transfer thanks to the retractable armrests.

Easily transportable thanks to its small size.

Now, handicapped people may enjoy the freedom of movement and ability to travel abroad, to visit distant family members, to sleep outside of their homes and to be independent and worry-free about accessibility issues. In short, the Wheelable wheelchair allows you to be just as you once were or as you would like to be.

Seatar's WheelAble can be fitted with a special basin to convert it into an accessible mobile toilet.

The wheelchair is available with two different seat opening widths: 17.8 cm (WheelAble small) or 20.5 cm (WheelAble standard).

Available options

DIMENSIONS :

Open :
